
TRUE INDUSTRIAL GEAR OIL

Extreme Pressure Industrial Gear Oils

Description

IGO EP is a range of extreme pressure industrial gear oils designed for use in all designs of industrial gear sets with circulating and splash lubrication. The additives used in the formulation gives good wear protection even under extremes of pressure and shock loading with a high degree of oxidation stability.

Outstanding Features

IGO EP oils have the following features:

- Extreme pressure enhanced
- Good oxidation resistance
- Wide range of use
- Protects against shock loads

Directions for Use

IGO EP may be used in any industrial gear set which calls for the use of an extreme pressure gear oil. They give wear protection to the gears and bearings even under shock loading conditions and provide excellent anti-corrosion properties. All the grades are in accordance with the requirements of leading gearbox manufacturers and AGMA specifications.

Technical Data

	EP 68	EP 100	EP 150	EP 220	EP 320	EP 460
ISO Grade	68	100	150	220	320	460
Visc. @ 40	68	100	150	220	320	460
Visc. @ 100°C	8.7	11	15	19	24	31
Flash Point °C	220	230	240	245	250	265

Pack Sizes

210 Lts Drum
20 Lts Pail
5 Lts Bottle
